COMPANY INTRODUCTION

About Vietnam Kingair Conditioning Equipment Company Limited

Established in 2014, Vietnam Kingair Conditioning Equipment Company Limited is authorized and exclusive distribution agent for Kingair brand products, such as,

- Water Chiller
- Air Handling Unit
- Fan Coil Unit
- Smart Air Conditioner, Precision Air Conditioner

In 1956, Kingair brand was established in Taipei-Taiwan, with more than 60 years of experience in the fields of research, development, production and trade about specialized air conditioner products for the fields:

Tramcar, Ship

Building, Trade Center

Factories, other areas where need precision air conditioner, etc.

History about formation and development of Kingair brand:

In 1956: Kingair Refrigeration Company was established in Taiwan.

Forerunner is company which supply refrigeration equipment for the subway.

So far, the company has achieved the number 1 position in the HVAC development history, becoming the most development research, production and distribution brand in China-Taiwan

In 1997: AHU became typical products in China

Chiller units, AHU, FCU entered and was provided to the national project in China

Recognized as "Foreign business investor with advanced technology"

Won the "Best service quality in China mainland market"

Achieved the BR1 certification

In 1999: Achieved the ISO9001 certification

Recognized as the most reliable refrigeration equipment manufacturer

Products are comply with CE certification

Successful in equitization and get the investment by European investors for their projects

In 2000: Achieved the ISO14001 certification

Achieved the National quality testing about compressor quality

In 2001: Awarded the "National torch" for the Enterprise with advanced technology

Awarded many exclusive patents

In 2002: The product comply the CCMS certification

In 2003: The product comply the CCC certification

In 2004: All products are licensed for the product.

In 2005: Kingair Air Conditioner got the certification about National Energy Saving Product (China) which certified by Certification State Center (CSC). Became one of the firstly five enterprises about central air conditioning whose products have been certified by air conditioner and energy saving chiller Group

In 2009: Achieved the AHRI and CNAS from AIF

In 2012: Built the second factory in Taiwan and the fourth factory in China

Throughout the time of establishment and development with long-time experience in manufacturing, Kingair has achieved major certifications which issued by world trade-technical association, such as.

Water chillers reach the standard of 550/590 and 551/591 (AHRI) which recognized by the Trade association who representing manufacturers of air conditioner, refrigeration and heating equipment in worldwide, and get Certification about energy efficiency which certified by AIF(USA) Association. Similarly, the cooling coil units (use for the AHU, FCU) which designed and manufactured by Kingair also achieved above AHRI certification Kingair's AHU and FCU all meet the CNAS certification (ILAC - MRA) by AIF organization who recognize for the International laboratories to suitable to the requirements of shell structure, supporting frame, thermal bridge problems as well as noise level.

Furthermore, Kingair's production criteria also meet the standards such as ISO 9001, ISO 14001, and ISO18001 with the certifications which meet the criteria for supply to the European market, such as CE, CEECC, etc. In addition, FCU and AHU all meet energy standard of Leed, Gree Mark, etc., (air flow rate, input power) and there is specific certification for the equipment.

At present, Vietnam Kingair has a factory to produce AHU, FCU in Vietnam. There are four large factories in China and two factories in Taiwan where always ensure for the problem of supply unit fastest and on schedule.

KINGAIR CULTURE

Sound training system

We believe that an outstanding company is created by excellent talents. For this purpose, the company set up a full-time training department, adopts the method of combination of internal education and training with external training and establishes a sound training system from identity of enterprise culture to the recognition of various products and mastering of post skills to finally realize the organic unity of upgrading of employee' own values and the company's flourishing.

Perfect enterprise management

Quality is the core culture of Kingair Conditioning. To this end, we have formulate a perfect management system and created a good work and living atmosphere comprehensively from promoting of total quality management (TQM) and total productive maintenance (TPM) of equipment to small group activity (SGA) and quality control circle (QCC) and then to PDCA continuous improvement cycle and 6S activity and other management methods and means to provide powerful management means and execution methods for the sound development of the enterprise.

Strength of group

King is vigorous and striving group. We make full use of the strength of the group to minimize the value and it is the eternal pursuit of each employee of the company to make our distinguished customers satisfied.

Society Responsibility

By thanksgiving, making contribution, returning the society and carrying hope with love, the company has donated 9 Hope Primary Schools successively and won "Res Cross Contribution Service Award of Shaoxing". The company will continue supporting the Hope Project and Red Cross humanitarian aid cause, care for the vulnerable groups, donate generously and show its love to actively perform the social responsibility.

KINGAIR TECHNOLOGY

Science and Technology Innovation

During half a century, science and technology innovation has enabled Kingair Conditioning to achieve multiple No. 1s in the air-conditioning history in China; at the same time, multiple products of King were listed into the national key products and national-level Torch Program project and obtained more than 50 national-level patent technology.

Environmental Protection and Energy Saving

In 2005, Zhejiang Kingair Conditioning obtained the national energy-saving certificate issued by China Standard Certification Center (CSC), and became one of the first five central air-conditioning enterprises passing the energy-saving certification of packaged air-conditioning and water chilling

High level and technology R&D team

The company has a strong R&D center with over 50 product R&D and design personnel, including more than 20% with the master's degree and doctor's degree. Besides, the company boasts a series of complete and mature R&D design platform and tool software, such as ANSYS fluid dynamics analysis software, CFD computing fluid system simulation software and so on.

Exchange and cooperation

Zhejiang Kingair Conditioning has carried out a series of technical cooperation with multiple famous universities and scientific research institutions, such as Hefei General Mechanical and Electrical Products Institute, Tsinghua University, Zhejiang University and Xi'an Jiaotong University.

Besides, Zhejiang Kingair Conditioning has established the strategic alliance with multiple world-famous brands, such as Siemens, ABB, Emerson and Danfoss. It is dedicated to developing more and better environment-friendly and energy-saving products.

SIEMENS

Danfoss

EMERSON

ABB

Experiment test capability

Zhejiang Kingair Conditioning has the comprehensive performance laboratory of refrigerating and air-conditioning products with the state-of-the-art air-conditioning industry technology and most diversified products in China: 700KW air-cooling heat pump unit performance test bench, 3000KW water source heat pump performance test bench, semi-anechoic noise test room, 200KW multifunctional enthalpy difference laboratory, salt mist ageing test bench and automotive transportation vibration simulation test bench.

In 2007, Zhejiang King Test Center passed the review of China National Accreditation Service for Conformity Assessment, and became the "national-level testing center". The test reports issued by the Company were recognized by 58 countries worldwide.

Every product of Zhejiang Kingair Conditioning has passed the strict airtightness and vacuum test to ensure no leakage point of the whole machine and the components; besides, the crucial corrosion resistance and durability and performance tests have ensured that every product is a high-reliability product.

Top-ranking Components Manufacturing Equipments

Kingair owns the world's leading manufacturing and processing equipments: international advanced AMADA large CNC turret punch imported from Japan; AMADA bending machine; stereo processing center imported from USA; automatic welding robot imported from Austria; WAGNER automatic painting line imported from Germany; DAVI full hydraulic four-roll plate bending machine imported from Italy.

Top-ranking production line

Over the years, we are always careful building the top-ranking production line. Successively invest tens of millions of RMB, build the production lines of chiller, heat pump, terminal units, commercial air conditioners, industrial special air conditioner etc. Detailing every operation procedure, improve every pitch point, let the value contained in Kingair brand reflect through every high quality product.

KINGAIR SERVICE

Perfect after-sale service network

Circumspect Client Review and Customer Satisfaction Research

"High Credibility, Good Quality, and Considerate Service" is our resounding slogan convey to the world, in order to understand the operation condition of product, we will communicate with you regularly, listen to your requirements, and provide warmly and timely service for you.

Professional After-sale Service

Kingair has trained service team and advanced service management system, All service engineers to go through rigorous training certificates, At the same time the company annual organization service engineer customer training and Kingair products practice remote monitoring, and stands ready to provide professional and technical solutions seminars.
